What is a *Getting Started with TI-Nspire (3 day)* Institute?

Getting Started with TI-Nspire is for teachers who have never used TI-Nspire before. There will be three topics of Getting Started: Middle Grades Math; High School Math and Connecting Math and Science. Participants will gain familiarity with the handheld and Teacher Edition software. They will gain experience using the Math Nspired activities that accompany the TI-Nspire solution. The T3 Instructors will also discuss the pedagogical implications of using the TI-Nspire solution and the Math Nspired activities.

*Includes TI Nspire calculator as part of the Teacher Bundle
